

## Registered Psychologist

### Short Description

A market leader in Occupational Rehabilitation specialising in managing workplace injuries is looking for a qualified Psychologist.

### Advertisement

Are you:

- Looking for an opportunity to see where else your Psychology degree can take you?
- Looking for an opportunity to use your experience outside of the clinical practice environment
- Looking to work within a corporate environment working with some of the biggest businesses in Australia?
- Looking to work with a dynamic, high-growth market leader within the Occupational Rehabilitation Industry?

Nabernet is currently seeking an experienced Registered Psychologist to join its team.

### Company Profile

Nabernet is a market leader in the Occupational Rehabilitation Industry specialising in the management of workplace injuries through early intervention and timely response with expertise in Victorian WorkCover and Comcare legislation.

Our early intervention approach focuses on workplace-based intervention and management of the return to work process through defined goals and milestones in a team approach with all stakeholders.

Nabernet's team consists of talented individuals with clinical experience within the rehabilitation sector. Employees are rewarded with generous remuneration, flexible work arrangements, an emphasis on work-life balance and a friendly, supportive culture.

### Position description and competency requirements

As a Rehabilitation Consultant (registered Psychologist), you will be required to:

- Assist in undertaking vocational-based medico-legal assessments and reports and providing occupational rehabilitation services including the management of stress claims and early intervention services.
- Complete high level private consulting in addition to providing occupational rehabilitation services.
- Liaise closely with medical practitioners, employers and WorkSafe agents to facilitate a return to work for employees experiencing a stress related work injury, requiring the ability to negotiate, identify and make appropriate recommendations.
- Perform unique worksite assessments and use your lateral thinking and forward planning skills to identify potential return to work pathways in line with likely recovery milestones.
- Use your problem solving skills, clinical experience and knowledge of injury management to perform assessments and facilitate the return to work of claimants.

Applicants will ideally possess:

- Qualifications in Psychology (registered)
- Demonstrated knowledge of Workers' Compensation and injury management
- Individuals must have full registration with the Australian Health Practitioner's Regulation Agency (AHPRA).
- Proven competency in report writing

- Advanced written and verbal communication skills to liaise key stakeholders.

You will be based in Melbourne but may be required to travel to regional locations as required.
